CompSync

# Smarter Billing Starts Here

Simplify your workers compensation billing with CompSync™, a secure payroll reporting solution powered by InsurePay®.

With CompSync, you can report payroll throughout the policy term by connecting with your payroll provider or self-reporting directly through InsurePay®. Premium payments are then based on reported payroll to more closely reflect actual payroll exposure. This can be especially beneficial if you have payroll that fluctuates throughout the year, helping reduce the potential for significant premium adjustments at audit.

## Getting Started Is Easy

Talk with your local independent insurance agent to see if CompSync is the right billing solution for your business.

### How It Works

- Your independent agency selects CompSync as your billing option when submitting your policy to Auto-Owners.
- You receive an email invitation from InsurePay® with instructions for creating your secure account.
- Once you've created your account, you can log in and connect it to your payroll provider or choose to self-report.
- After your account is set up, payments are automatically withdrawn after payroll is reported.

CompSync is powered by InsurePay®
